## Universitatea "POLITEHNICA" din București

# Temă finală – Proiect informatică aplicată –

Student : Ștergărel Elisabeta-Elena

Grupa: 411C

Cod PIA Hunt: 510

Profesor coordonator: Prof. Univ. Dr. Ing. Stanciu Mihai

Data: 25.05.2023

An universitar: 2022-2023

Cod PIA Hunt: 510

### Specificațiile temei:

#### Pararametrul de afișat pe 7 segmente:

uv\_index\_max ; fiind 7 valori, se vor afișa pe rând pe afișajul dual cu 7 segmente, cu durată de 2.5 secunde pentru o valoare. Întrucât sunt valori pe mai mult de 2 cifre, de forma xy.z (1 zecimală), se vor afișa

- mai întâi partea întreagă, timp de 1s,
- apoi partea zecimală, cu punctul zecimal aprins în față, timp de 1s,
- apoi afișajul stins pt. 0.5s

#### Parametru de afișat pe bargraph:

aprinderea a câte unui singur LED pe bargraph: LED-ul 1 când pe afișaj e valoarea pt. ziua 1, LED-ul 2 pt ziua 2, etc

#### Valorile de afișat pe serială:

La început, să se scrie "PIA - Echipa 510", numele rețelei WiFi, RSSI-ul, să apară cele 7 valori separate prin virgulă, pe același rând, așa cum sunt citite din API, de exemplu: 05:50,05:52,05:53,...

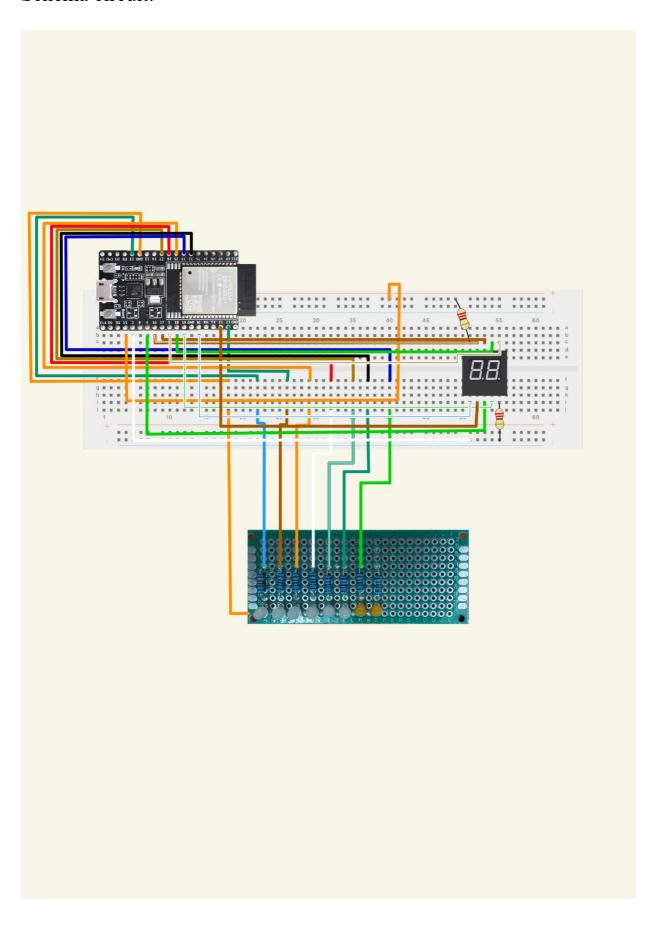

Pe măsură ce apar pe afișajul cu 7 segmente, valorile să apară și pe serială, cîte 2 pe un rând, precedate de nr. zilei si 2 două puncte, de exemplu:

1: xxx 2: yyy (xxx este valoarea parametrului pt prima zi)

3: zzz 4: ttt

. . .

# Schemă circuit:
